Instance state	running	IPv4 Public IP	52.90.196.110
Instance type	t2.micro	IPv6 IPs	-

2. Create AMI of above instance and launch it. (instance B)

The screenshot shows the AWS Management Console interface. The 'Instances' page is active, displaying a list of instances. The instance 'maithelyA-ec2' (ID: i-082d0d25e26e9ada8) is in the 'running' state. A context menu is open over this instance, with the 'Create Image' option selected. The console also shows the 'Launch Instance' button and the 'Actions' dropdown menu. The bottom of the screen displays the file manager with files like 'maithelykey....pem', 'sample.war', 'ADHAR.jpg', and 'unnamed (3).jpg'.
